FR Pour une utilisation sûre, il est de votre responsabilité de : • Lire attentivement tous les documents contenus dans le CD joint avant la mise en service de l'équipement, • D'installer, d'utiliser, d'entretenir et de réparer l'équipement conformément aux préconisations de SAMES KREMLIN ainsi qu'aux réglementations nationales et/ou locales, • Vous assurez que les utilisateurs de cet équipement ont été formés, ont parfaitement compris les règles de sécurité et qu'ils les appliquent.	UK To ensure safe use of the machinery, it is your responsibility to: • Carefully read all documents contained on the enclosed CD before putting the machinery into service, • Install, use, maintain and repair the machinery in accordance with SAMES KREMLIN's recommendations and national and/or local regulations, • Make sure that the users of the machinery have received proper training and that they have perfectly understood the safety rules and apply them.	DE Eine sichere Nutzung setzt voraus, dass Sie : • alle in der CD enthaltenen Dokumente vor der Inbetriebnahme der Anlage aufmerksam lesen, • die Anlage im Einklang mit den Empfehlungen von SAMES KREMLIN sowie mit den nationalen und/oder lokalen Bestimmungen installieren, verwenden, warten und reparieren, • sich vergewissern, dass die Nutzer dieser Anlage angemessen geschult wurden, die Sicherheitsbestimmungen verstanden haben und sie anwenden.
ES Para una utilización segura, será de su responsabilidad: • leer atentamente todos los documentos que se incluyen en el CD adjunto antes de la puesta en servicio del equipo, • instalar, utilizar, efectuar el mantenimiento y reparar el equipo con arreglo a las recomendaciones de SAMES KREMLIN y a la normativa nacional y/o local, • cerciorarse de que los usuarios de este equipo han recibido la formación necesaria, han entendido perfectamente las normas de seguridad y las aplican.	IT Per un uso sicuro, vi invitiamo a: • leggere attentamente tutta la documentazione contenuta nel CD allegato prima della messa in funzione dell'apparecchio, • installare, utilizzare, mantenere e riparare l'apparecchio rispettando le raccomandazioni di SAMES KREMLIN, nonché le normative nazionali e/o locali, • accertarvi che gli utilizzatori dell'apparecchio abbiano ricevuto adeguata formazione, abbiano perfettamente compreso le regole di sicurezza e le applichino.	PT Para uma utilização segura, é da sua responsabilidade: • Ler atentamente todos os documentos incluídos no CD em anexo antes de pôr o equipamento em funcionamento, • Proceder à instalação, utilização, manutenção e reparação do equipamento de acordo com as preconizações de SAMES KREMLIN, bem como com outros regulamentos nacionais e/ou locais aplicáveis, • Assegurar-se que os utilizadores do equipamento foram devidamente capacitados, compreenderam perfeitamente e aplicam as devidas regras de segurança.
NL Voor een veilig gebruik dient u: • alle document op de bijgevoegde cd aandachtig te lezen alvorens het apparaat in werking te stellen, • het apparaat te installeren, gebruiken, onderhouden en repareren volgens de door SAMES KREMLIN gegeven aanbevelingen en overeenkomstig de nationale en/of plaatselijke reglementeringen, • zeker te stellen dat de gebruikers van dit apparaat zijn opgeleid, de veiligheidsregels perfect hebben begrepen en dat zij die ook toepassen.	SE För en säker användning av utrustningen ansvarar ni för följande: • Läs noga samtliga dokument som finns på den medföljande cd-skivan innan utrustningen tas i drift. • Installera, använd, underhåll och reparera utrustningen enligt anvisningarna från SAMES KREMLIN och enligt nationella och/eller lokala bestämmelser. • Försäkra er om att användare av denna utrustning erhållit utbildning, till fullo förstått säkerhetsföreskrifterna och tillämpar dem.	FI Käytön turvallisuuden varmistamiseksi velvollisuutesi on: • Lukea huolella kaikki CD:llä olevat asiakirjat ennen laitteiston käyttöönottoa, • Noudattaa laitteiston asennuksessa, käytössä, kunnossapidossa ja huollossa SAMES KREMLIN in suosituksia sekä kansallisia ja/tai paikallisia määräyksiä, • Varmistaa, että laitteiston käyttäjät ovat koulutettuja ja ymmärtävät täysin turvallisuusmääräykset ja miten niitä sovelletaan.
PL Dla zapewnienia bezpiecznego użytkowania na użytkownika spoczywa obowiązek: • Uważnego zapoznania się ze wszystkimi dokumentami znajdującymi się na załączonej płycie CD przed pierwszym uruchomieniem urządzenia, • Instalowania, użytkowania, konserwacji i naprawy urządzenia zgodnie z zaleceniami firmy SAMES KREMLIN oraz z przepisami miejscowymi, • Upewnienia, że wszyscy przeszkoleni użytkownicy urządzenia zrozumieli zasady bezpieczeństwa i stosują się do nich.	CS Pro bezpečné používání jste povinni: • Před uvedením zařízení do provozu si pozorně přečíst veškeré dokumenty obsažené na příloženém CD, • Nainstalovat, používat, udržívat a opravovat zařízení v souladu s pokyny firmy SAMES KREMLIN a s národními a/nebo místními legislativními předpisy, • Ujistit se, že uživatelé tohoto zařízení byli vyškoleni, že dokonale pochopili bezpečnostní pravidla a že je dodržují.	SL Za varno uporabo ste dolžni: • natančno prebrati vse dokumente na CD pred zagonom stroja, • instalirati, uporabljati, vzdrževati in popravljati opremo po določilih SAMES KREMLIN in v skladu z veljavnimi nacionalnimi in/ali lokalnimi predpisi, • poskrbeti, da so uporabniki te opreme ustrezno usposobljeni, poznajo varnostne predpise in da jih upoštevajo.
SK V záujme bezpečného je vašou povinnosťou: • pozorne si prečítať všetky dokumenty obsiahnuté na príloženom CD predtým, ako zariadenie uvediete do prevádzky, • nainštalovať, používať, udržiavať a opravovať zariadenie v súlade s odporúčaniami spoločnosti SAMES KREMLIN a národnými a/alebo miestnymi predpismi, • uistiť sa, že používatelia tohto zariadenia boli zaškolení, riadne porozumeli pravidlám bezpečnosti a používajú ich.	HU A biztonságos használat érdekében az Ön felelőssége, hogy: • a berendezés üzembe helyezése előtt figyelmesen elolvassa a mellékelt CD által tartalmazott összes dokumentumot, • a berendezést a SAMES KREMLIN ajánlásainak valamint a nemzeti és/vagy helyi szabályozásoknak megfelelően helyezze üzembe, használja, tartsa karban és javítsa, • megbizonyosodjon róla, hogy a berendezés felhasználói képzettek, tökéletesen megértették és alkalmazzák a biztonsági előírásokat.	RO Pentru o utilizare sigură, este responsabilitatea dvs. să: • Citiți cu atenție toate documentele de pe CD-ul anexat, înainte de punerea în funcțiune a echipamentului, • Instalați, utilizați, întrețineți și reparați echipamentul conform instrucțiunilor SAMES KREMLIN precum și reglementărilor naționale și/sau locale, • Vă asigurați că utilizatorii acestui echipament au fost instruiți, au înțeles perfect regulile de securitate și le aplică integral.

1. SAFETY INSTRUCTIONS

GENERAL SAFETY INSTRUCTIONS

CAUTION : The equipment can be dangerous if you do not follow our instructions concerning installation and servicing described in this manual and in accordance with applicable European standards and local national safety regulations.

Please carefully read all the instruction literature before operating your equipment.

Only trained operators can use the equipment.

The foreman must ensure that the operator has understood the safety instructions for this equipment as well as the instructions in the manuals for the different parts and accessories.

Read carefully all instruction manuals, label markings before operating the equipment.

Incorrect use may result in injury. This equipment is for professional use only. It must be used only for what it has been designed for. Never modify the equipment. The parts and accessories supplied must be regularly inspected. Defective or worn parts must be replaced.

Guards (motor cover, coupling shields, connectors,...) have been designed for a safe use of the equipment.

The manufacturer will not be held responsible for bodily injury or failure and / or property damage due to destruction, the overshadowing or the partial or total removal of the guards.

Never exceed the equipment components' maximum working pressure.

Comply with regulations concerning safety, fire risks, electrical regulations in force in the country of final destination of the material. Use only products or solvent compatible with the parts in contact with the material (refer to data sheet of the material manufacturer).

PICTOGRAMS

					
NIP HAZARD	WARNING MOVING ELEVATOR	WARNING MOVING PARTS	WARNING MOVING SHOVEL	DO NOT EXCEED THIS PRESSURE	HIGH PRESSURE HAZARD
					
RELIEF OR DRAIN VALVE	WARNING HOSE UNDER PRESSURE	WEAR GLASSES OBLIGATORY	WEAR OF GLOVES IS OBLIGATORY	PRODUCT VAPOR HAZARDS	WARNING HOT PARTS OR AREAS
					
ELECTRICAL HAZARD	WARNING FIRE HAZARDS	EXPLOSION HAZARDS	GROUNDING	WARNING (USER)	WARNING SERIOUS INJURIES

PRESSURE HAZARDS

Current legislation requires that an **air relief valve** be fitted in the air supply circuit to the air motor to prevent over pressurisation. This safety feature ensures that it is not possible to supply the air motor with excessive air pressure that may cause injury.

Please ensure that a **material drain valve** is fitted in the fluid circuit to drain and depressurise the circuit. Once depressurised and drained, work /servicing may then commence on the equipment. Please remember to close these valves when restarting the system.

HIGH PRESSURE INJECTION HAZARDS

When working with high pressure equipment, special care is required. Fluid leaks can occur. There is a risk of material being injected to any exposed parts of body, this could cause severe injury :

- medical care must be sought immediately if paint is injected under the skin or in other parts of the body (eyes, fingers).
- never point the spray gun at any one. Never try to stop the spray with your hands or fingers nor with rags or similars.
- **follow the shut down procedure and always depressurize air and fluid circuits** before carrying out any servicing on the gun (cleaning, checking, maintenance of the material or cleaning of the gun nozzles).
- for the guns equipped with a safety device, always lock the trigger when not in use.

FIRE - EXPLOSION - SPARKS - STATIC ELECTRICITY HAZARDS

A poor earth connection, inadequate ventilation, sparks or static electricity can cause an explosion or fire. to avoid these risks when using or servicing SAMES KREMLIN equipment, the following safety procedures must be followed :

- ensure a good earth connection and ground the parts to be handled i.e. solvents, materials, components and equipment,
- ensure adequate ventilation,
- keep working area clean and free from waste solvents, chemicals, or solid waste i.e. rags, paper and empty chemicals drums,
- never use electrical switches / power if in an atmosphere of volatile solvent vapour,
- stop working immediately in case of electrical arcs,
- never store chemicals and solvents in the working area.
- use paint whose flash point is the highest possible to prevent from any formation of gas and inflammable vapours (refer to materials' safety instructions),
- install a cover on the drums to reduce the diffusion of gas and vapours in the spraybooth.

TOXIC PRODUCT HAZARDS

Toxic products or vapours can cause severe injury not only through contact with the body, but also if the products are ingested or inhaled. It is imperative :

- to know the material products and their risks,
- notified or hazardous materials must be stored in accordance with the regulations,
- the material must be stored in an appropriate container, never place materials in a container where there is a risk of spillage or leakage,
- a procedure must be applied for the safe disposal of waste material. It must comply with all prevailing regulations and legislations of the country where the equipment is to be used,
- protective clothing should always be worn in compliance with the material manufacturers' recommendations,
- depending on the application and chemical safety instructions, safety glasses, hearing protective earplug, gloves, foot wear, protective masks and possible breathing equipment should be worn to comply with the regulations (Refer to chapter "Safety equipment of SAMES KREMLIN selection guide).

CAUTION!

It is forbidden to use material containing high concentrations of halogenated hydrocarbon solvents with **aluminium** or **zinc fillers**. Non-compliance with the instructions may cause explosion risk causing serious or fatal injury.

EQUIPMENT REQUIREMENTS

Guards (motor cover, coupling shields, connectors,...) have been designed for a safe use of the equipment.

The manufacturer will not be held responsible for bodily injury or failure and / or property damage due to destruction, the overshadowing or the partial or total removal of the guards.

PUMP

Before carrying out any work, it is imperative to read and clearly understand the disassembly and reassembly instructions before servicing. The operator must understand the equipment and the safety instructions. These instructions are available in the equipment manuals.

The air motor is designed to be mounted with a pump. Never modify any components or couplings. When operating, please keep hands away from moving parts. Before starting up the equipment, please read the PRESSURE RELIEF instructions. Please ensure that any relief or drain valves fitted are in good working order.

HOSES

- Keep hoses out of circulation areas, moving parts or hot surfaces,
- Never expose product hoses to temperature higher than + 60°C / 140° F or lower than 0°C / 32° F,
- Never pull or use the hoses to move the equipment,
- Tighten all fittings as well as the hoses before operating the equipment,
- Check the hoses regularly; change them if they are damaged,
- Never exceed the maximum working pressure (MWP) indicated on the hose.

USED PRODUCTS

Considering the wide variety of products that are available and can be used in our equipment it is impossible to check and make recommendations for all chemical data, regarding the risks of possible chemical attack and their long term chemical reaction

SAMES KREMLIN can not be held liable for :

- compatibility of wetted parts,
- risks to staff and the surroundings,
- for worn or defective parts, for faulty equipment or units, or the quality of final product.

It is the responsibility of the user to know and prevent any possible risks such as toxic vapours, fires or explosions. He shall determine the risks of immediate reactions or pursuant to repeated exposures of the staff,

SAMES KREMLIN shall not be liable for physical injuries, direct or indirect material damages caused by the use of chemicals.

2. HANDLING

Check the weight and the dimensions of the equipment

(☞ refer to 'Technical features' section of the instruction manual

If weight and dimensions are too important, the unloading must be carried out by means of a forklift or any other appropriate means with a qualified personnel and in a clear horizontal area to prevent from risks of damage injury or an accident.

The centre of gravity is not in the centre of the machine : carry out by hand a stability-test after having lifted the whole at 10 cm / 3.937" maximum.

After the unloading, the handling of the whole (eg: elevator pump) is carried out by means of a pallet truck taking the bottom part of the frame.

Remark : Each pump motor is fitted with a ring. The ring is designed for the hoisting of one pump and can not be used for the handling of the complete assembly.

3. STORING

Storing before installation :

- Storing ambient temperature : 0 / +50 °C / 0 / +122°F
- Protect the whole against dust, water trickling, dampness and shocks.

Storing after installation :

- Operating temperature : +15 / +35 °C / +59 / +138.2° F
- Protect the whole against dust, water trickling, dampness and shocks.

4. INSTALLATION OF THE EQUIPMENT

The machine is installed on a stable horizontal floor (for eg a concrete flag).

The machine shall be made stable by the use of holding down bolts or by the use of other anchoring methods, strong enough to prevent unintended bodily movement of the equipment.

To avoid risks caused by static electricity, the equipment as well as its components must be grounded.

- **For the pumping equipments** (pumps, pneumatic rams, frame...), a section wire of 2.5 mm² is fixed on the material. Use this wire to connect the material to "the general ground". In case of severe environments (mechanical protection of the wire of earthing insufficient, vibrations, mobile material...) where function damages at the ground are probable, the user have to replace the provided wire of 2.5 mm² by a device more adapted to its environment (wire with a more important section, bonding strip, fixing by thimble with eyelet...).

The continuity of the ground must be controlled by a qualified electrician. If the continuity of the ground is not ensured, check the terminal, the wire and the earthing point. **Never** use the material without have solved this problem.

- In the severe cases of environments (mechanical protection of the wire of earthing insufficient, vibrations, mobile material...) where damages of the function put at the ground are probable, the user will have to replace the wire of 2.5 mm² provided, by a device more adapted to its environment (wire of more important section, bonding strip, fixing by thimble with eyelet...),
- **The gun** must be 'grounded' via a material hose or an air hose. In case of spraying by means of a gun with cup, the air hose must be conductive,
- **The materials to be painted** must also be grounded.

All the materials situated in the working area shall be grounded.

- **Never store** more than necessary inflammable materials inside the working area,
- The materials must be stored into **approved drums** and grounded,
- Use only grounded **metals containers** for the use of cleaning solvents,
- **Cardboard and paper are prohibited.**

5. MARKING OF THE EQUIPMENT

Each equipment has a label plate with the name of the manufacturer, the equipment part number, the interesting informations to use correctly the equipment (pressure, voltage,...) and sometimes the above pictogram.

The equipment is designed with and consists of high quality materials and components which can be re-used.

The 2012/19/UE European Directive covers all equipments with a crossed-out bin pictogram. Please inform yourself about the collection systems for electric and electronic equipments.

Please act in accordance with local rules and **do not dispose of old equipment with household wastes**. A correct disposal of old equipment will help prevent negative consequences for the environment and health.

SPECIFIC SAFETY INSTRUCTIONS

Airmix® and Airless Guns

TRANSLATION FROM THE ORIGINAL MANUAL

IMPORTANT : Before assembly and start-up, please read and clearly understand all the documents relating to this equipment (professional use only).

THE PICTURES AND DRAWINGS ARE NON CONTRACTUAL. WE RESERVE THE RIGHT TO MAKE CHANGES WITHOUT PRIOR NOTICE.

SAMES KREMLIN SAS
13, chemin de Malacher
38 240 - MEYLAN - France
☎ : 33 (0)4 76 41 60 60

www.sames-kremlin.com

■ SPECIFIC SAFETY INSTRUCTIONS

Install a conductive fluid hose **or** a conductive air hose on the Airmix® gun to ground the gun.
Install a conductive fluid hose on the Airless gun to ground the gun.

Never exceed the maximum operating pressures of the equipment components.
(For the Airless guns - ASB : maximum working pressure = 240 bar / 3480 psi).
(For the Airless guns - SFLOW™ : maximum working pressure = 450 bar / 6526 psi).
(For the Airmix ® guns - AVX : maximum working pressure = 200 bar / 2900.6 psi).

Always depressurize air and hoses before carrying out any servicing on the gun.

Never wipe the end of the nozzle with the fingers.
Never point the spray gun at anyone or at any part of the body.
Always use the safety trigger lock when leaving the gun unattended.

Always use the equipment in a well ventilated area to protect health and to minimise the risks from fire and explosions.

To protect the operator, protective clothing (gloves, respirator mask, glasses, clothes...) are required.

■ GENERAL SAFETY INSTRUCTIONS

CAUTION : The equipment can be dangerous if not used in accordance to the rules mentioned in this instruction manual. Please ensure you carefully read all the instructions before operating your equipment.

Only trained operators can use the equipment.

The foreman must ensure that the operator has perfectly understood the safety instructions for this equipment as well as the instructions in the manuals for the different parts and accessories.

Read carefully all instruction manuals, label markings before operating the equipment.

Comply with regulations concerning safety, fire risks, electrical supply and voltage in force in the country of final destination of the equipment.

 **Refer to the document
"Installation and safety instructions"
(doc. 578.001.130-UK)**

AIRLESS MANUAL GUN

SFLOW™

Disassembly / Reassembly

TRANSLATION FROM THE ORIGINAL MANUAL

IMPORTANT : Before assembly and start-up, please read and clearly understand all the documents relating to the equipment (professional use only).

THE PICTURES AND DRAWINGS ARE NOT CONTRACTUAL. WE RESERVE THE RIGHT TO MAKE CHANGES WITHOUT PRIOR NOTICE.

SAMES KREMLIN SAS

13, chemin de Malacher
38 240 - MEYLAN - France

☎ : 33 (0)4 76 41 60 60

www.sames-kremlin.com

CAUTION :

Before any intervention on the gun, shut off the compressed air supply and depressurize the circuits controlling the opening of the gun.

The gun is manufactured under the ATEX agreement and can no be modified. SAMES KREMLIN will no be held responsible for any failure to comply with that instruction.

Before removing a component of the gun, some precautions have to be taken :

- Shut off the pump main supply,
- Lock the gun trigger with the safety device,
- Relieve pressure from circuit by opening pump pressure relief valve,
- Carefully loosen the gun swivel.

➡ **IMPORTANT : never work on gun when connected to hose.**

Always engage the trigger lock-off when gun is not spraying.

Before reassembling the different components, some precautions must be taken :

- **Clean all the parts with the appropriate cleaning solvent and a brush.**
- **Install new seals if it is necessary after having lubricated them with PTFE grease.**
- **Install new parts if it is necessary.**

Index	Instructions	Description	Part number
A 1	PTFE grease	PTFE grease (10 ml / 0.0026 US gal)	560.440.101
A 3	Grease (vaseline)	-	-
C 2	Low strength - Anaerobic Adhesive	Loctite 222 (50 ml / 0.013 US gal)	554.180.010
S 1	Torque screwing : 2 Nm / 1.4752 Ft/Lbs		
S 2	Torque screwing : 10 Nm / 7.376 Ft/Lbs		

SEAT HOLDER ASSEMBLY (IND. 15) REPLACEMENT

Remove the air cap, then unscrew the seat holder assembly (15) by means of the wrench supplied with the gun. Be careful to move the needle back (36 or 37) during this operation to prevent from damaging the ball.

Loosen the cartridge stop (23) and the screw (21) by means of a screwdriver, take off the seat (19), the PEEK seal (20) and the helicoils (18).

Check parts' and the O-Ring (22) conditions. Change them if necessary.

Reassemble the seat (19), the PEEK seal (20) and the helicoils (18).

Tighten the screw (21) - screwing torque : 2 Nm / 1.4752 Ft/Lbs.

Tighten the cartridge stop (23) manually.

Lubricate the seat holder thread (16) with grease.

Tighten the seat holder (15) in the gun by means of the wrench - screwing torque : 10 Nm / 7.376 Ft/Lbs. Be careful to move the needle back (36 or 37) during this operation to prevent from damaging the ball.

NOTE : for applications from thick to pasty materials, we recommend an installation without helicoils (18) in order to limit pressure drops.

■ CARTRIDGE-NEEDLE ASSEMBLY (IND. 25) REPLACEMENT

Remove the trigger (36 or 37) by taking off the screw (39) and the trigger spindle (38).

By means of the key hole (B) on the trigger protection (10), take off the trigger (36 or 37) removing the screw (39) and the trigger axis (38).

Remove the needle-cartridge assembly (25) gun frontwards. You can use the upside down trigger to exert a lever arm.

If necessary, change the seal (26) or the whole cartridge-needle assembly (25).

Grease the seal (26).

Install the new cartridge-needle assembly frontwards.

When installing the seat holder, the cartridge-needle assembly must abut.

Reinstall the trigger ensuring that the brass stop is to the rear (sectional view below).

Tighten the seat holder with the wrench (torque screwing : 10 Nm / 7.376 Ft/Lbs) making sure you trigger the gun during this operation to prevent from damaging the ball.

▪ **SPRING (IND. 30 OR 31), STROKE-END STOP (IND. 29) REPLACEMENT**

Remove the cartridge-needle assembly (25) as previously indicated.

Remove the spring (30 or 31) from the cartridge-needle assembly (25), then from the stroke-end stop (29).

Change the spring (30 or 31) and/or the stroke-end stop (29).

➡ **IMPORTANT : For the 275 bar / 3989 psi version, the spring is grey.**

For the 470 bar / 6820 psi, the spring is red.

Apply glue on the trigger spindle (38) and reinstall parts in the reverse order of the disassembly sequence.

■ FILTER REPLACEMENT (IND. 40)

Separate the upper part of the gun trigger protection (10).

Unscrew the handle fitting (45) by means of the trigger protection (10).

Remove the filter (40) manually or by means of the hole (A) that is on the trigger protection. That process enables to remove the filter easily when it is clogged. Note that the filter inlet is equipped with a hexagon which can help the removal of the filter if it is clogged.

Clean or change the filter (40). If using a PA filter, change the filter (40).

Reinstall the parts in the reverse order of the disassembly sequence.

■ DISASSEMBLY OF THE TIPS

REVERSING TIPS (IND. 4, 5, 6, 7)

Untighten the head ring (4).

Pivot the tip (5) at 90 degrees angle from the horizontal axis and remove it upwards.

Remove the seat (6) and seal (7) assembly by using the front part of the handle (5) as indicated above.

Clean and/or change the parts.

Install the seat (6) on the seal (7).

Insert and orientate the seat (6) and seal (7) assembly by using the front part of the handle (5).

Re-Insert the handle (5) into the head ring (4) at 90 degree angle from the horizontal axis then pivot it (flame downwards).

Install on the gun and tighten the assembly manually.

FLAT TIPS (IND. 8, 9, 55)

Untighten the head ring.

Remove the tip (9) as well as the seal (55) from the base (8).

Clean and/or change the parts.

Reinstall the parts in the reverse order of the disassembly sequence.

SKILL™ TIPS (IND. 8, 11)

Unscrew the base (8) and remove the tip (11) from it.

Then, remove the bearing (1).

Remove the screw (2) by means of an allen key n° 3.

➔ Dissociation of the carbide insert (3) and the spacer (4).

Clean the inside of the tip (5).

 Do not remove the insert inside the tip (5).

Reinstall the parts in the reverse order of the disassembly sequence.

■ **SCREEN REPLACEMENT (IND. 64, 65 OR 66) (ON REQUEST)**

Install the screen n°4 (64) or n°6 (65) or n°12 (66) on the cartridge and stop of the seat holder assembly (15a / 15b / 15c).

Place the assembly at the front of the gun body as previously indicated.

Pour établir la référence d'une buse, remplacer les croix par le nombre repère de la buse précédé de 000.40X.XXX

Exemple : pour commander une buse 25.13, utiliser la référence : 000 402 513

To obtain tip part number, replace the crosses by the engraved tip number preceded by 000.40X.XXX

Example : use part number 000 402 513 to obtain tip 25.13

Die Bestell-Nr. für eine Wendedüse erhält man, indem man die Kreuze durch die vorgenannte Kennzahl ersetzt : 000.40X.XXX

Beispiel : für eine Düse 25.13 ergibt sich die Bestell-Nr. : 000 402 513

Para establecer la referencia de una boquilla reemplazar las cruces por el número de la boquilla precedido por 000.40X.XXX

ejemplo : para pedir una boquilla 25.13 emplear la referencia : 000 402 513

Les buses plates garantissent une grande précision dans leurs performances.
 Pour établir la référence d'une buse, remplacer les croix par le nombre gravé sur la buse précédé de 000.00X.XXX
 Exemple : pour commander une buse 25.13, utiliser la référence : 000 002 513.

Flat tips guaranty a very high precision in performance.
 To obtain tip part number, replace the crosses by the number engraved on the tip preceded by 000.00X.XXX
 Example : use part number 000 002 513 to obtain tip 25.13.

Die Flachstrahl-Düsen garantieren eine hohe Spritzstrahlpräzision.
 Die X durch die auf der Düse gravierte Nummer ersetzen Bestell-Nr. 000.00X.XXX
 Beispiel : für eine Düse 25.13 ergibt sich die Bestell-Nr. : 000 002 513.

Las boquillas planas garantizan una gran precisión de resultados.
 Para establecer la referencia de una boquilla reemplazar las cruces por el número de la boquilla precedido por 000.00X.XXX
 Ejemplo : para pedir una boquilla 25.13 emplear la referencia : 000 002 513

AIRLESS MANUAL GUN

PREVENTIVE MAINTENANCE

TRANSLATION FROM THE ORIGINAL MANUAL

IMPORTANT : Before assembly and start-up, please read and clearly understand all the documents relating to this equipment (professional use only).

THE PICTURES AND DRAWINGS ARE NON CONTRACTUAL. WE RESERVE THE RIGHT TO MAKE CHANGES WITHOUT PRIOR NOTICE.

SAMES KREMLIN SAS
13, chemin de Malacher
38 240 - MEYLAN - France
☎ : 33 (0)4 76 41 60 60

www.sames-kremlin.com

In order to protect the operator, protective clothing (gloves, respirator mask, glasses, hearing protective earplug, clothes...) are required.

Use the equipment in a properly ventilated area.

This spray gun is a precision tool. Its correct functioning requires regular maintenance, carried out with care. When it is carried out directly after use, the cleaning of the gun is faster and easier.

➔ **Never use metallic brushes, files or pliers when dismantling the gun.**

■ **SHORT DURATION SHUTDOWN (LESS THAN 3 HOURS)**

Leave the equipment as it is. In any case, if the tip becomes a little clogged with material, it is best to clean it with a brush and some solvent.

■ **LONG DURATION SHUTDOWN**

Shut off gun air and fluid supply.

Change material with solvent and trigger the gun to depressurize the hoses and flush the pump, the hoses and the gun.

Unscrew the aircap ring to remove the reversing tip or the flat tip. Put it in the solvent to soak and then brush it clean. Remove the seat holder. Remove the needle gun frontwards. Soak the tip. Brush it. Clean inside the gun with a brush and solvent. Insist particularly on threads.

Flush the gun.

➔ **Never soak the gun itself in solvent.**

➔ **Use only products or solvent compatible with the parts in contact with the material (refer to data sheet of the material manufacturer).**

The spraying quality depends directly on the shape of the tip. It is recommended to replace it regularly to get a constant fan pattern.

A premature wearing deforms the tip and leads to two troubles :

- fan pattern reduced and charged at the center,
- a higher output.

TROUBLE	CAUSE	SOLUTION
Material is no longer coming out of the gun	Clogged tip	Check gun material supply. For the reversible tip, pivot the tip at 180 degree to unclog it.
Low flow rate	Filter partially clogged (if there is one)	If no improvement : shut off the pump pressure. Depressurize the hoses. Remove and clean the flat tip or the reversible tip and the filter. Change the filter if necessary.
Spray fan is not uniform	Tip partially clogged	For the reversible tip, pivot the tip at 180 degree to unclog it. If no improvement : remove it and change it. For the flat tip, remove it and change it.
	Unappropriate tip	Use an appropriate tip size
	Worn tip	Change tip
	Fluid cannot be sprayed	Increase pump supply air pressure
	Material viscosity too high	Reduce viscosity
Fluid leak	Bad tightness between the needle ball and its seat	Clean the seat or replace the needle and the seat
	Worn cartridge	Replace the cartridge
	Handle fitting loose or defective	Tighten the handle fitting or change it
	Seat holder loose or defective	Tighten the seat holder or change it
	Defective reversible tip seal	Change it
	Defective seat	Change it
	Head ring not correctly tightened	Tighten it

AIRLESS MANUAL GUN

OPERATING, START-UP AND HANDLING

TRANSLATION FROM THE ORIGINAL MANUAL

IMPORTANT : Before assembly and start-up, please read and clearly understand all the documents relating to this equipment (professional use only).

THE PICTURES AND DRAWINGS ARE NON CONTRACTUAL. WE RESERVE THE RIGHT TO MAKE CHANGES WITHOUT PRIOR NOTICE.

SAMES KREMLIN SAS
13, chemin de Malacher
38 240 - MEYLAN - France
☎ : 33 (0)4 76 41 60 60

www.sames-kremlin.com

1. OPERATING PRINCIPLE

The AIRLESS spraying enables to make material flow through a tip, at high pressure without any atomizing air.

The gun is supplied with material by means of only one hose.

To optimize the spraying, the following parameters are requested : viscosity, charges, materials pressure, tip size.

The gun is supplied with a material needle that controls the opening and the closing of the seat when triggering the gun.

The fan pattern depends only of the tip :

- with flat tips, you obtain a very fine and regular fan,
- with reversing tips, the unclogging is easier.

The fluid is drawn by the AIRLESS pump into the container and forced under pressure via the hose, towards the gun.

2. START-UP

Safety instructions :

- Never try to stop the spray fan with any part of the body (hands, fingers...) or with rags. Never point the spray gun at anyone or at any part of the body.
- The operator will need medical attention if the high pressure material spray is in contact with the body (eyes, fingers...).
- **Always depressurize air and hoses** before carrying out any servicing on the gun.

In order to protect the operator, protective clothing (gloves, respirator mask, glasses, hearing protective earplug, clothes...) are required.

Use the equipment in a properly ventilated area.

- 1- Trigger the gun.
- 2- Connect the material hose between the gun and the pump material outlet.
- 3- Ground the pump.
- 4- Interconnect the air equipment with the air pressure network (clean air - maximum 6 bar / 87 psi). Install a filter, if necessary.
- 5- Connect all the hoses.

■ FLUSHING WITH SOLVENT

- 6- Insert the suction rod into the solvent filled container.
- 7- Increase the pressure so that the solvent hose out from the suction rod.
- 8- Point the gun towards the container, unlock and trigger the spray gun.
- 9- Increase **progressively** the air regulator so that the pump runs slowly. Trigger the gun until the material flows out regularly.

■ PRIMING WITH MATERIAL

10- Remove the suction rod from the solvent filled container and immerse it into the material container.

11- Point the gun towards the material container and trigger the gun until the material flows out regularly.

■ WORK

12- Unlock the trigger gun to install the flat tip or the reversing tip depending upon your work. (Please to select the tip, refer to the tip chart).

13- Adjust the regulator to obtain the required pressure and material flow rate.

3. GUN HANDLING

Keep the gun perpendicular to the surface to be painted. Avoid working with the wrist. Do not forget that crossed sweeps cannot correct irregularities.

Spraying from a stationary gun will not give you even coverage. Start the pass and trigger just before the leading edge. Release the trigger before the pass ends, just after the trailing edge of the object.

Make sure that overlapping spray passes are even and regular.

4. SHUTDOWN AT THE END OF THE WORK

■ SHORT DURATION SHUTDOWN

- 1- Decrease the regulator pressure until reading **0 bar / 0 psi** on the gauge.
- 2- Trigger the spray gun to depressurize the system.
- 3- Lock the gun trigger.
- 4- Remove the flat tip or the reversing tip and soak it into solvent.

■ LONG DURATION SHUTDOWN

- 1- Decrease the regulator pressure until reading **1 bar / 14.503 psi** on the gauge.
- 2- Remove the flat tip or the reversing tip and soak it into solvent.
- 3- Remove the suction rod from the material container and soak it into solvent.
- 4- Point the spray gun towards the material container and trigger the gun. When the material flows out, point the spray gun towards the solvent container.
- 5- When the solvent flows out, release the gun trigger.

Nota : release the gun trigger when the pump piston is in low position. To prevent from damaging the seals when starting the pump, the piston must be immersed into solvent.

- 6- Fully unscrew the air regulator.
- 7- Press the gun trigger to decompress the hoses.

AIRLESS MANUAL GUN

SFLOW™

TECHNICAL FEATURES

TRANSLATION FROM THE ORIGINAL MANUAL

IMPORTANT : Before assembly and start-up, please read and clearly understand all the documents relating to the equipment (professional use only).

THE PICTURES AND DRAWINGS ARE NOT CONTRACTUAL. WE RESERVE THE RIGHT TO MAKE CHANGES WITHOUT PRIOR NOTICE.

SAMES KREMLIN SAS

38 240 - MEYLAN - France

☎ : 33 (0)4 76 41 60 60

www.sames-kremlin.com

1. DESCRIPTION

The SFLOW™ gun is an AIRLESS manual gun for professional use only.

There are two versions of the gun based upon the working pressure (275 bar / 3989 psi or 470 bar / 6820 psi).

The SFLOW™ gun is a swivel fitting gun.

It is recommended for a wide range of 1K and 2K components, high solid materials, epoxy, Polyurethan, anti-corrosion, anti-fouling. It is also recommended for glazing, finishing enamel, acrylic paint materials, front coatings, latex, expanding materials,....

It is not recommended for wated-based materials.

2. TECHNICAL FEATURES

FEATURES	GUN SFLOW - 275 bar / 3989 psi	GUN SFLOW - 470 bar / 6820 psi
Material supply pressure	Max. 275 bar / 3989 psi	Max. 470 bar / 6820 psi
Fluid flow rate	Depending on tip size (Refer to Doc. 573.459.050 - Spare Parts)	
Weight (gun + air cap + tip)	520 g 570 g (with swivel fitting)	
Maximum operating temperature	50°C / 117° F	
Wetted parts	PA, Aluminium, Stainless steel, PTFE, Carbide, POM	
Seat (removable)	Carbide	
Material fitting	M 1/2 JIC / M 1/4 NPS	
Safety device	Safety lever + tip protection + trigger protection	
Filter	From 50 to 200 mesh / from 300 µ to 74 µ	
Weighted sound pressure (LAeq) (under pressure / with tip, model 18-13)	88.5 dBa	88.6 dBa

3. INSTALLATION

■ DESCRIPTION OF THE LABEL MARKING

Marking in accordance with the ATEX regulation

SAMES KREMLIN FRANCE	Name and address of the manufacturer	
CE  II 2 G	CE : European conformity  : For use in explosive area II : group II 2 : class 2 G : gas Surface equipment meant to an area where explosive atmospheres due to gas, vapours, mists are liable to appear from time to time in usual operating.	On the body
Ex h IIB T6 X	Ex : Marking of conformity with European standards h : Mode of protection for non electrical device IIB : Gas group T6 : Temperature class - Maximum surface temperature : 85°C / 185° F X : Special conditions that apply for a safe use. Refer to instructions listed in the instruction manuals accompanying your purchase.	
Gb	Gb : Equipment protection level (Gas zone1)	
20xx	Marking of the manufacturing year (with 4 characters)	
SFLOW™	Gun model	
P prod : xx bar / xx psi	Maximum fluid pressure	

■ INSTALLATION DIAGRAM

Nota : drawing of an installation with Airless pump, model 30-C25

A	Explosive area : Area 1 (Z1) or area 2 (Z2) : spraybooth
B	Non-explosive area
1	Airless pump
2	Airless gun, model SFLOW™
3	Fluid hose

4	Air supply
5	Fluid filter

The 1 m / 39.37" distance indicated in the diagram is given for information purposes only and hold harmless to SAMES KREMLIN. The user is responsible for the extraction and conditioning of the painting area where the equipment is used, for working conditions (refer to EN 60079-10 standard).

The 1 m / 39.37" distance may be modified if trials carried out by the user deem this necessary.

Nota: Choose the appropriate pump to ensure that the working pressure supplied is suitable for the selected gun.

Please ensure when fitting the **high pressure** paint hose between the gun and the pump that the fittings are firmly tightened.

Nota : The 2 gun fluid hoses must be conductive.
