

The ultimate personal protection for abrasive blasting

The "IRONGRIP" is constructed using different high-grade materials including leather and rubber for high resilience.

The IRONGRIP can be used in conjunction with the Blastsafe Suits, Blastsafe SKYWALKER boots and Blastsafe ORIGIN helmet, as the final solution system for harsh abrasive blasting environment.

In Norse mythology, Járngreipr (Old Norse 'iron grippers') or Járnglófar ('iron gauntlets'[1]) are the iron gloves of the god Thor. According to the Prose Edda, along with the hammer Mjöllnir and the belt Megingjörð, Járngreipr is one of Thor's three crucial possessions.

The gloves allow for good finger dexterity - performance level 3 (acc. to EN ISO 21420:2020).

In addition, the glove material has been subjected to the flammability test according to EN 14594:2018 (test method 3 acc. to EN 13274-4:2020) and has shown a high resistance to ignition.

Reinforced fingertips against recoil.
The glove material is resistant to ignition.

Rubber patches for protection of back of hand and fingers

Extra leather patches for better grip and wear resistance

Dust proof and easy to operate seal

Higher quality leather for optimised comfort and safety
